

M15 Signals EA Settings

1 How do I get to the settings?

The screenshot displays a trading platform interface with a menu open over a EURUSD, H1 chart. The menu is titled "M15Signals EA" and contains the following options:

- Select Take Profit: TakeProfit 3
- StopLoss at TakeProfit 1: do nothing
- StopLoss at TakeProfit 2: to BreakEven
- Close Trade at TakeProfit 1: do nothing
- Close Trade at TakeProfit 2: do nothing
- Close Trade at TakeProfit 3: 100 %

Additional information shown in the menu includes:

- Fix Lot: 0.03
- Name of System: M15signalsEA
- Version: 1.21

The background chart shows a price movement from approximately 1.1310 to 1.1390. A hand cursor is positioned over the "M15Signals EA" menu item. The interface also shows a "Market Watch" panel on the left and a "Folige.me" logo in the bottom right corner.

Right-click in the chart with our M15 Signals EA

2 How do I get to the settings?

The screenshot displays the MetaTrader 4 trading platform interface. The main window shows a candlestick chart for EURUSD,H1. A context menu is open over the chart, with 'Expert Advisors' selected. The 'Expert Advisors' submenu is also open, showing 'Properties...' (F7) highlighted by a mouse cursor. The 'Properties...' option is circled in yellow. The 'M15SignalsEA' Expert Advisor settings are visible in the background, including:

- GMT: 2025.05.27 17:31:10
- License valid: 2025.11.21 16:30:23
- REAL & DEMO accounts allowed
- Select Take Profit: TakeProfit 3
- StopLoss at TakeProfit 1: do nothing
- StopLoss at TakeProfit 2: to BreakEven
- Close Trade at TakeProfit 1: do nothing
- Close Trade at TakeProfit 2: do nothing
- Close Trade at TakeProfit 3: 100 %
- Fix Lot: 0.03
- Name of System: M15SignalsEA
- Version: 1.21

The interface also shows a Market Watch window on the left with various currency pairs and their bid/ask prices. The Navigator window on the bottom left shows the Expert Advisors folder expanded. The bottom right corner features a 'Folge.me' logo.

Click on "Expert Advisor and then on "Properties"

3 Click on "Inputs" to get to the settings. Part 1/3 - Inputs

Settings Lots, TakeProfit, StopLoss

username or email address: Please enter your e-mail address or the user name of your account with us here. Click here to login: www.m15signalsea.com/login

EA Magicnumber: freely selectable - only important if more than one EA works on one MT4 account

Lots-Mode:

- **Fix Lots:** each trade starts with the same lot size
- **Percent of Balance:** the lot size depends on the available capital in the account

Lots (for "Mode Fix Lots"): The fixed lot size. Please note: If you allow partial closing of trades, the fixed lot size must be twice larger than the minimum lot size.

Mode Percentage (0.01-10.0): When set to X percent, the following is determined: If the trade should go into the stop loss, a maximum of X percent of the current free capital may be risked. The EA then calculates the lot size from this. Since the difference between the current price and the StopLoss is always different and the free amount always changes, the lot is never the same size.

Max. LotSize for percentage: The maximum lot size when trading with x percent of capital.

Calc. Lots with Margin or Balance: If set to X per cent, the following is defined: Calculation of the lot size based on the capital or the free margin

Select Order Mode:

- **Set take profit & stop loss to the Trade:** Take profit and stop loss are entered in the trade. The broker thus knows your exit options and closes the trade accordingly. This option is not allowed in the USA because of the different stop losses!
 - **Hide TakeProfit & StopLoss:** Take profit and stop loss are hidden from the broker. The EA manages these values in the background. This option must be selected for users and brokers based in the USA! The Expert Advisor closes the trades when the Take Profit or Stop Loss is reached.
-

Symbol Prefix: Your broker has **prefixed** characters in front of the currency pairs, like **ep**EURUSD. Then enter them here, like **ep**.

Symbol Suffix: Your broker has **put signs after** the currency pairs, like **.FX**. Then enter them here, like **.FX**.

Excluded Symbols from the transmitter: Assets / symbols that should not be traded. The EA ignores these signals.

Change icon: Differences between the sender symbol and your broker symbol. This usually concerns metals or commodities, which can be quite different between brokers. In this case, please enter them here: "Sender symbol, receiver symbol" (example: "XAUUSD, GOLD").

Select Trading Style:

Select max. Take profit: Which TakeProfit should be used? The following options are available:

- **no Take Profit:** set no TP to the trades
- **Take Profit 1:** sets only the 1st TakeProfit
- **Take Profit 2:** sets the 2nd TakeProfit
- **Take Profit 3:** sets the 3rd TakeProfit

Close part of the trade at take profit 1-3: The EA can close parts of the trade when a certain TakeProfit is reached. Percentages can be entered here. x percent of the original trade will then be closed.

Set StopLoss at take profit 1: Change StopLoss when TakeProfit 1 has been reached

- **do nothing:** Do not move the StopLoss
- **to Break even:** StopLoss to BreakEven put (profit fuse – max. Loss = 0)

Set StopLoss at take profit 2: Change StopLoss when TakeProfit 2 has been reached

- **do nothing:** Do not move the stop loss
- **to Break even:** StopLoss to BreakEven put (profit fuse – max. Loss = 0)
- **to Profit 1:** Set StopLoss to TakeProfit 1 (securing the profit at Take Profit 1).

3. Holiday Date end	1970.01.01 00:00
3. Close trades	close only trades in profit

Trading Days & Hours

On which days and at which time (broker time) may the EA open trades?

Trading days: Allow trades on the following days ("12345") 1 = Monday, 2 = Tuesday, ..., 5 = Friday

Start Trading: Time (broker time), time **from** which trades may be opened

Stop Trading: Time (broker time), time **until** which trades may be opened

Close Trades at "no activ time":

- **close all trades:** All trades are closed when "Stop Trading" is reached, regardless of whether they are in the profit or loss zone.
- **close only trades in profit:** Only the trades in the profit zone are closed. The negative trades continue to run and will continue to be monitored by the EA.

Holiday Date Start & Holiday Date Stop: No trading takes place between these times. No matter what is entered in the "Trading Days & Hours" settings.

Close trades: See point above "Close Trades at on activ time".
